

Unisys Government-Wide Aquisition Contract Center

Bringing Best Value and Contracting Alternatives to Government Customers

agile

Imagine it. Contract vehicles that are Agile, Affordable and Accessible.

Today, government agencies continue to be more customer-focused and technology is an integral part of this evolution. Business strategies and information technology intersect at every turn and business outcomes depend more than ever on an agency making wise IT decisions. In today's environment of shrinking IT budgets, technology must not only be able to provide better services to the public, it must also be affordable. This means that agency decision-makers must also carefully evaluate the return on investment for every IT expenditure. To achieve this goal, agencies must choose both the best IT solution and services to help achieve their mission and the optimum vehicle for purchasing those services.

For five decades, Unisys has helped governments and businesses throughout the world integrate information technology to create customer-focused solutions. Our

system integration professionals combine expertise in outsourcing, infrastructure support, security services, Microsoft-based solutions and open systems technology with an unrelenting commitment to customer satisfaction to help government agencies transform their vision to value. And our proven service delivery processes ensure that we provide the best business, functional and technology knowledge to every project.

Unisys offers buying opportunities through a wide range of contract vehicles — enabling our customers to choose the best and most cost-effective purchasing choice to fit each agency's unique needs and requirements. To learn more about the complete range of Unisys contracting alternatives available, visit our Web site at:
www.unisys.com/go/contracts

Unisys is ranked as one of the top providers of services delivered through government-wide indefinite-delivery/indefinite quantity (IDIQ) contracts, multiple-award GSA Schedules, and multi-agency and agency-specific IDIQ contracts. As a leading systems integrator with a global presence, Unisys capabilities are focused on providing clients with five key areas of expertise:

- **Outsourcing.** Unisys Outsourcing solutions enable both IT and the business to drive innovation and achieve higher performance through visibility and clear alignment of their IT infrastructure with business goals.
- **Real-time Infrastructure (RTI).** Unisys RTI solutions enable agencies to shift IT spending from being predominantly maintenance to innovation by providing business value. We collaborate with our clients to create a roadmap for their IT transformation towards an optimized, shared, virtualized, agile infrastructure.
- **Enterprise Security.** At Unisys, our Enterprise Security solutions provide the visibility to help organizations: identify vulnerabilities, define effective security policies, and manage enterprise risk. Through visibility, organizations can decide for themselves, “how much security is enough?”
- **Microsoft Expertise.** Recognizing the need for enterprise CIOs and business leaders to achieve efficiency in their organizations, Unisys Microsoft solutions deliver value by deploying advanced Microsoft technology in secure, scalable environments, linked with other assets to provide highly adaptive, modernized infrastructures.
- **Open Source.** Unisys recognizes that Open Source opens the doorway for organizations to greatly enhance the flexibility of their infrastructure, while significantly reducing costs. Our Open Source solutions drive more value from current and future infrastructure, traditional software and other IT assets by improving flexibility, enabling growth and innovation, and dramatically reducing IT costs.

Unisys understands that vehicles and multiple award GSA Schedules are becoming the contract vehicles of choice for many agencies by reducing acquisition time and utilizing pre-selected contractors. To meet the increasing need to respond rapidly and effectively to IDIQ and GSA schedule solicitations, Unisys has a Government-wide Acquisition

Contract (GWAC) Center that uses automated tools to ensure our IDIQ and GSA Schedule customers receive rapid, innovative, cost-effective responses to their solicitations. Once an IDIQ or GSA Schedule task order has been awarded to Unisys, our GWAC Center continuously monitors performance and serves as the single point of contact for all IDIQ and GSA Schedule issues.

Our GWAC Center’s primary goal is to maximize the use of IDIQ and GSA Schedule vehicles while ensuring our clients receive optimum service delivery and contractual support for every task order issued to Unisys. We use a web-based client-satisfaction tool to periodically survey our customers to ensure their satisfaction with Unisys services. Through our GWAC Center, our customers have access to more than 31,000 Unisys personnel worldwide, plus facilities and resources in all 50 states and over 100 countries. To support the growth of our IDIQ contracts, the GWAC Center can access a global sales force of 455 sales professionals who use Siebel tools to focus on increasing business worldwide.

In addition to holding a variety of Government-wide IDIQ contracts and Multiple Award Schedule contracts, Unisys also supports multi-agency and agency-specific IDIQ contracts for many customers, including the Department of the Treasury, Department of Homeland Security, and the Department of Justice.

Unisys is the fourth largest GSA GWAC contract holder with more than \$1.4 billion in orders.

Advantages of IDIQ Contracts

- Enable agencies to procure leading technology from groups of pre-selected vendors
- Offer flexible choice of short-term or long-term commitment
- Reduce contracting paperwork
- Provide the ability to be under contract in approximately 1– 8 weeks
- Allow execution without protest
- Require minimal contract usage fee (fees range from .06% – 6% depending on the contract)

Advantages of Multiple Award Schedules

- Offer pre-determined fair and reasonable prices
- Reduce ordering time
- Provide a wide selection of commercial items and state-of-the-art technologies
- Enable access to easy on-line ordering
- Allow for direct relationship with contractor
- Require minimal contract usage fees—.75%
